JONATHAN JOHNSON

Deltona, FL | 407-269-1989 | JonathanJohnson158@gmail.com

PROFESSIONAL SUMMARY

Cybersecurity professional with enterprise security platform ownership in a healthcare environment. Owner of Zscaler ZIA and ZPA, well-versed in Microsoft Entra ID, Microsoft Defender, and identity and access management. Experience spans zero trust access, endpoint and email security, security monitoring, and enterprise authentication.

TECHNICAL SKILLS

Security platforms: Zscaler ZIA / ZPA, Xona, Microsoft Defender, Abnormal AI

Identity and access: Microsoft Entra ID, Active Directory, Imprivata, Conditional Access, SAML SSO, MFA, PIM

Detection and scripting: Splunk, SPL, KQL, PowerShell, authentication and security log analysis

Infrastructure: Windows, Linux, Docker, firewall rules, virtualization, Tailscale

PROFESSIONAL EXPERIENCE

Halifax Health | Daytona Beach, FL

Cybersecurity Analyst I June 2026 - Present

- Own Zscaler Internet Access (ZIA) and Private Access (ZPA), overseeing platform operations, security policies, and secure access to web and internal applications.
- Manage identity and access controls across Microsoft Entra ID and Active Directory, working with Conditional Access, MFA, Privileged Identity Management (PIM), and single sign-on integrations.
- Use Microsoft Defender for endpoint security monitoring, threat investigation, and incident response support, correlating activity across endpoint and identity systems.
- Develop and maintain Splunk alerts and dashboards that support daily security monitoring, investigations, and operational visibility across the organization.
- Oversee secure third-party access through Xona, managing platform configuration, vendor access, authentication integrations, and ongoing security controls.

Remote Team Leader February 2025 - June 2026

- Served as an escalation resource for complex technical issues and coordinated cross-functional response through Major Incident Management bridge calls.
- Enforced identity verification and MFA procedures for sensitive account changes and mentored technicians on troubleshooting, incident handling, and security practices.

SELECTED PROJECTS

Home Infrastructure and Security Lab

- Build and maintain Linux and Docker services with Tailscale remote access, UFW firewall controls, and Prometheus/Grafana monitoring; troubleshoot connectivity and service availability across physical and virtual systems.

EDUCATION AND CERTIFICATION

CompTIA Security+

Associate in Science, Cybersecurity | Expected December 2026
Daytona State College | Daytona Beach, FL
